About

Systems Analyst and Developer with 5+ years of experience, currently responsible for N2 support of the MV system at Clínica Kozma, working with Oracle, PL/SQL, requirements analysis, incident resolution, and query optimization. I have previously developed critical integrations used by DASA network hospitals, with high stability and reduced failures. I also build solutions with Oracle Database, SQL, PL/SQL, Node.js, Python, and React, contributing to integrations, process automation, and performance improvements in corporate applications.

Experience

Systems Analyst and Developer - MV N2 Support

Clínica Kozma · October 2024 - Present (1 year 11 months) · Passo Fundo, Rio Grande do Sul, Brazil

Responsible for support, analysis, and development of solutions for the hospital environment using the MV system and Oracle database.

- Development and maintenance of PL/SQL routines.
- Analysis and resolution of N2 support incidents.
- Development of SQL queries to support business areas.
- System integration using APIs and services.
- Performance optimization of database queries and processes.
- Development of automations using Node.js and Python.
- Development of dashboards using TypeScript and React APIs.

Systems Analyst

Agrodanieli Ind. Com. Ltda · January 2024 - October 2024 (10 months) · Tapejara, Rio Grande do Sul, Brazil

Analysis of business rules, technical investigation of database objects (PL/SQL, T-SQL, and PL/pgSQL), and automation of corporate processes.

- Process and data flow analysis, identifying bottlenecks and proposing improvements.
- Technical investigation of database objects (procedures, functions, views, and queries).
- Adjustments and validation of business rules applied to corporate systems.
- Diagnosis and automation of processes to speed up user activities.
- Direct technical support to internal teams and vendors.

Integrations Analyst and Developer

DataIntegra · March 2021 - January 2024 (2 years 11 months) · Passo Fundo, RS

Worked as the developer responsible for critical integrations in the hospital environment, focused on Oracle PL/SQL, performance, and data quality.

- Advanced development in Oracle PL/SQL: procedures, functions, packages, triggers, views, and jobs.
- Optimization of critical queries through execution plan analysis and tuning.
- Built hospital integrations (patient registration, scheduling, and movement).
- Development of serverless APIs on AWS Lambda (Python).
- Worked with HL7 FHIR and HL7 v2 standards for hospital interoperability.

- Maintenance of XML/XSLT services on Tomcat.
- Hands-on experience with MV modules (MV2000 and SOULMV HTML5).
- Delivered critical integrations used by DASA network hospitals, with high stability.

Systems Analyst

Agrodanieli Ind. Com. Ltda · August 2016 - March 2021 (4 years 8 months) · Tapejara, Rio Grande do Sul, Brazil

Technical support, requirements gathering, and process improvements, including the Feed Mill (a fully automated environment).

- Support for internal users, problem analysis, and solution implementation.
- Mediation between the company and third-party vendors.
- Data manipulation and SQL query creation in Oracle.
- Mapping and improvement of processes in critical areas.
- Ticket management via Qualitor and end-to-end demand tracking.

Academic Education

Cruzeiro do Sul Virtual

Systems Analysis and Development, Information Technology

February 2021 - December 2023

Unyleya

Artificial Intelligence in Healthcare Services, Information Technology

August 2025 - March 2026

Certifications
